

»Pferdefutter zur Gelenkunterstützung ohne künstliche Aromen kaufen.«

Topic: Gelenkunterstützung für Pferde · volume — · prompt ID pr_ce22dac0-782c-42ea-a6e4-2c595108b4d6

0.44

Divergence score. On a 0 – 1 scale, this prompt sits at 0.44. Own-brand visibility ranges from 0 % to 33 % across the three active engines.

What the engines say

ChatGPT · own-brand visibility 33 %

Brands cited (tracked): **#1 Pavo**

Claim mix: 3 brand · 2 criterion

BRAND Fohlenhof Pferdefutter offers joint support

BRAND Equine Nutritional Solutions offers joint support

BRAND Pavo offers joint support

Gemini · own-brand visibility 0 %

Brands cited (tracked): **#1 Pferdegold**

Claim mix: 1 brand · 2 substance · 1 function · 1 criterion

BRAND Pferdegold Gelenke is a joint support product

SUBSTANCE Contains MSM for joint support

SUBSTANCE Contains Glucosamin for joint support

AI Overview · own-brand visibility 0 %

Prompt did not run on AI Overview in the sampled date range – absence is itself a drift signal.

Stable vs. divergent concepts

No claims overlap across 2+ engines. Every engine answers with its own concepts – the narrative is fully divergent.

Brand claims per engine (divergent by design):

ChatGPT: Fohlenhof Pferdefutter offers joint support, Equine Nutritional Solutions offers joint support, Pavo offers joint support

Suggested article

Format: Narrative-anchor article (stabilises the engine where the brand drifts) · **Length:** 1 500 – 2 500 words

Headline starting point: »Pferdefutter zur Gelenkunterstützung ohne künstliche Aromen kaufen. – what Pferdegold actually does«

Deterministic suggestion from silence type + Peec volume bucket. Starting point, not a lock-in.

Concrete moves

- **No stable concepts detected.** Decide which narrative your brand wants to own for this prompt, then seed it across owned (product page), editorial (blog), and citeable (study/PDF) assets in parallel.
- **Cross-engine lift.** You are visible on ChatGPT but invisible on Gemini, AI Overview. Replicate the winning engine's source pattern: inspect *top_sources* in the raw MCP data for this prompt, then pursue placements on those domains.
